

Christmas Event

Exploring and Using AnyZing

The exciting, Australian designed, AnyZing electronic meeting system utilises twelve keyboards linked to a computer program. The input from participants is projected onto a large screen. People can work through a particular idea and explore issues that appear on the screen.

This session is aimed at examining ISPI presentations over the last year and devising a strategy for the future.

- > Identify emerging issues and trends
- > Note those topics from 2008 that are worth developing
- > Building a program for 2009

This will be a hands-on experience, explaining and demonstrating AnyZing while evaluating and planning an ongoing future for ISPI.

The Facilitator

Max Dumais is an accredited practitioner in the lateral, parallel and new thinking methods of Dr Edward De Bono and was the founding CEO of the De Bono Institute. For the past seven years Max has pioneered the use of AnyZing by facilitating groups on site and increasingly, online.
