

Achieving Quality E-Learning Design

The Australian Flexible Learning Framework, through its Flexible Learning Toolbox business activity, has recently released a new Learning Design Tool which provides, in an easy to grasp format, four essential stages for preparing high quality learner focused course content.

The tool allows the user to save, review and modify work and includes a mapping feature to monitor progress through the stages.

- > Create an overview – what you would like your learning design to achieve, including qualifications it may feed into, which industry it will support and which job roles it will deliver training for.
- > Describe your learners – consider factors including age, special needs, educational background and reasons for training.
- > Choose your learning design – prioritise factors such as level of guidance, engagement and learner freedom to identify the most appropriate design.
- > Finalise learning design – follow an 11-step process to finalise your learning design including resources, assessment and activities.

This presentation is an opportunity to work through the tool with its designer, explore its capabilities and provide feedback for improvement and further development.

The Speaker

Jo Jenson is Manager, Educational Design, e-Works. e-Works objective is to manage major change projects that successfully implement the application of ICT in the VET and ACE sectors.

In 2008 Jo completed her Masters in Education (Workplace) focusing her research in the area of online learning. At Swinburne University Jo wrote the Organisational Function and Dynamics subject in the Postgraduate Certificate in Business Management. She currently lectures part-time in that program with both face-to-face and online students. Jo is also a member of the course advisory board for the Bachelor of Executive Administration at Holmesglen TAFE.
